# PHYCOCYANIN

**Food Industry**

**Cosmetics**

**Nutraceuticals**

**Pharmaceuticals**

- Phycocyanin is the blue pigment found in blue green algae, e.g. spirulina platensis.
- Phycocyanin is anti-oxidantive and anti-inflammatory used for many different applications.
- MyBiotech extracts phycocyanin from the microalgae spirulina using its proprietary MicroJet Reactor technology for cell rupture and extraction.
